Australia/New Zealand Weed Risk Assessment adapted for Florida.

Data used for analysis published in: Gordon, D.R., D.A. Onderdonk, A.M. Fox, R.K. Stocker, and C. Gantz. 2008. Predicting Invasive Plants in Florida using the Australian Weed Risk Assessment. Invasive Plant Science and Management 1: 178-195.

|                 | Lygodium microphyllum (Old World climbing fern)                                      |        |       |
|-----------------|--|--------|-------|
| Question number | Question   | Answer | Score |
| 1.01            | Is the species highly domesticated?  | n      | 0     |
| 1.02            | 1.02 Has the species become naturalised where grown?                                 |        |       |
| 1.03            | .03 Does the species have weedy races?   |        |       |
| 2.01            | Species suited to Florida's USDA climate zones (0-low; 1-intermediate; 2-high)       | 2      |       |
| 2.02            | Quality of climate match data (0-low; 1-intermediate; 2-high)                        | 2      |       |
| 2.03            | Broad climate suitability (environmental versatility)                                | У      | 1     |
| 2.04            | Native or naturalized in habitats with periodic inundation                           | У      | 1     |
| 2.05            | Does the species have a history of repeated introductions outside its natural range? | У      |       |
| 3.01            | Naturalized beyond native range  | У      | C     |
| 3.02            | Garden/amenity/disturbance weed  | n      | C     |
| 3.03            | Weed of agriculture  | n      | (     |
| 3.04            | Environmental weed   | n      | (     |
| 3.05            | Congeneric weed  | У      | (     |
| 4.01            | Produces spines, thorns or burrs   | n      | (     |
| 4.02            | Allelopathic   | n      | (     |
| 4.03            | Parasitic  | n      | (     |
| 4.04            | Unpalatable to grazing animals   |        |       |
| 4.05            | Toxic to animals   | n      | (     |
| 4.06            | Host for recognised pests and pathogens  |        |       |
| 4.07            | Causes allergies or is otherwise toxic to humans                                     | n      | (     |
| 4.08            | Creates a fire hazard in natural ecosystems  | У      | _     |
| 4.09            | Is a shade tolerant plant at some stage of its life cycle                            | У      | 1     |
| 4.1             | Grows on infertile soils (oligotrophic, limerock, or excessively draining soils)     |        |       |
| 4.11            | Climbing or smothering growth habit  | У      | 1     |
| 4.12            | Forms dense thickets   | У      | 1     |
| 5.01            | Aquatic  | n      | (     |
